

INTERNATIONAL SCHOOL ON MODERN PHYSICS AND RESEARCH

Unveiling the power of nuclear physics in society

July 14 – 18, 2025

INFN – Legnaro National Laboratory

Nuclear physics is a powerful resource with countless applications that impact society: from medicine to energy, from industrial uses to fundamental research. Are you ready to discover how the study of atoms and nuclei unlocks the doors to a world of knowledge? Through engaging lectures, stimulating debates, hands-on activities, and experiments, participants will fully immerse themselves in the Laboratory environment, exploring the cutting edge of physics research.
